MANUFACTURING OF SPARE PARTS,
SERVICING AND OVERHAUL OF MACHINERY

ALWAYS IN PERFECT MOTION

“Panta rhei” (Πάντα ῥεῖ), the famous expression associated with the Greek philosopher Heraclitus, meaning “Everything flows, everything changes,” perfectly describes the world we live in today, a world of constant movement and transformation, perhaps more than ever before.

Although we live in an age of modern technologies, one question remains: do we still need skilled people who can help us keep pace with a world that is changing and advancing every day? That is precisely our mission to provide support to both large and small systems, helping them remain in continuous motion, production and creation.

Even countries much larger than Montenegro, with stronger and more developed economies, relocate or outsource their manufacturing to Asian countries. This alone shows just how demanding it is today to maintain production within one's own country. And when we speak of a small economy that is still working towards European standards, it becomes clear just how serious and courageous an undertaking manufacturing in Montenegro truly is.

For nearly 30 years, Remid Vis has been a leader in Montenegro's manufacturing sector within its field of expertise. This leadership comes with a responsibility to uphold quality, dedication, integrity in business, and a strong commitment to our people, our community and the environment.

We may not be an industrial giant, but we have ambitious goals, a clear vision and a strong impact. We are there when our clients need us most - when a machine stops, production is at risk and every hour of downtime creates additional costs. We identify problems quickly, manufacture replacement parts and carry out repairs and overhauls, helping extend equipment life, reduce costs and keep operations running without unnecessary interruptions.

At the same time, we are ready to serve as a trusted partner to other manufacturers - producing components in Montenegro and distributing them throughout Europe and around the world.

Remid Vis has been built on solid foundations: care for our employees, partners, clients and the wider community. Our awards, initiatives and community activities are a testament to these values.

That is why we are determined to continue growing, developing and achieving new successes. As a partner to industry and a pillar of the Montenegrin economy, we will continue driving manufacturing forward in line with European standards.

Join us. Together towards new achievements!

Slobodan "Boban" Stanić
CEO

AREAS OF EXPERTISE

Our mission is to minimize machine downtime, extend the service life of equipment, and ensure continuity of production. We keep machines in motion through high-quality, professional service and an individual approach to every client and every project.

Since 1998, Remid Vis has been helping companies maintain the continuity of their operations. We specialize in precision machining, the manufacturing of new and replacement parts, the production of gears and other toothed components, as well as the servicing and overhaul of machine assemblies. We repair existing components and manufacture parts that are no longer available on the market.

Our team brings together experienced professionals with extensive backgrounds in industrial systems, shipyards and manufacturing facilities. We combine this expertise with modern equipment, an engineering-driven approach and the capability to carry out most processes in-house.

Every machine, production line and industrial system depends on the reliability of its components. Sometimes, a single worn gear, shaft or transmission element is enough to bring the entire system to a standstill. In such situations, simply replacing the part is not enough - what is needed is - knowledge, experience, precise diagnostics and a solution tailored to the specific equipment and its actual operating conditions.

That is where our work begins, restoring movement to the component, the machine, the production system and, ultimately, our client's business.

AREAS OF EXPERTISE

OVERHAUL OF MACHINERY, GEARBOXES, HYDRAULIC SYSTEMS AND COMPONENTS, MANUFACTURING AND REPAIR OF PARTS AND SYSTEMS, TRANSMISSIONS, PUMPS, HYDRAULICS, MOTORS...

WHAT WE OFFER

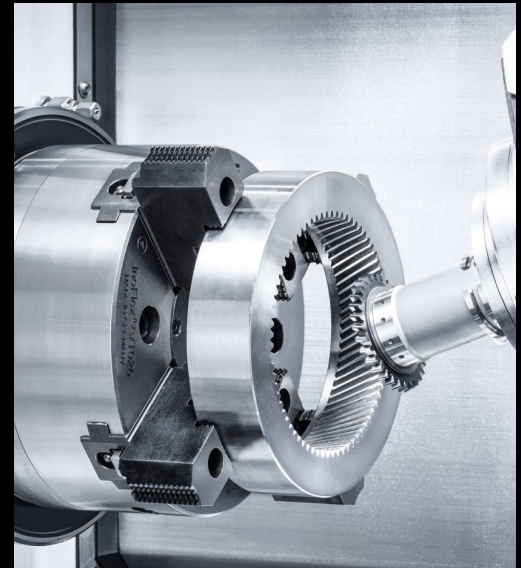

WE PRODUCE

GEARS
SPROCKETS
SHAFTS
AXLES
HALF-SHAFTS
PULLEYS
COUPLINGS
OTHER MACHINE
COMPONENTS

WE PROVIDE MACHINING SERVICES ON:

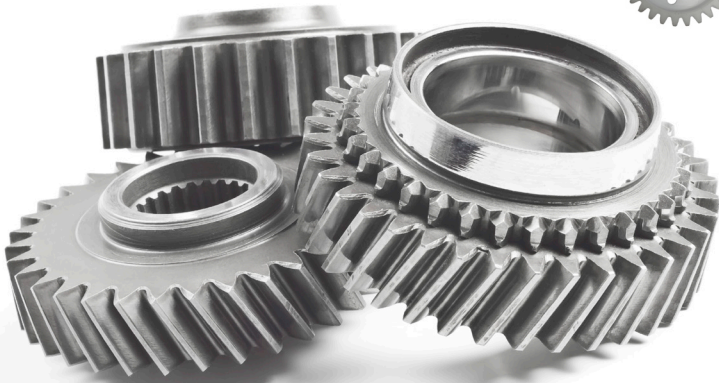

Lathe
Milling machine
Grinding machine
Gear-cutting machine
CNC laser cutter
DMG MORI – digital machine for precision
and complex machining of metal and plastic
components

**MANUFACTURING
OF ALL MACHINE
COMPONENTS, WITH
SPECIAL EXPERTISE IN
GEARS AND OTHER GEAR
COMPONENTS, AS WELL
AS THE OVERHAUL OF
MACHINE ASSEMBLIES.**

OUR PRODUCTS

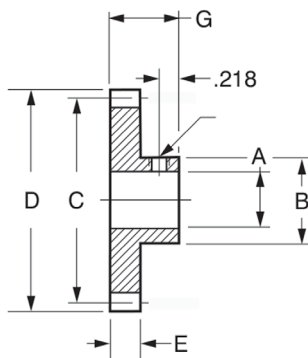

- GEARING COMPONENTS
- SPUR GEARS
- HELICAL GEARS
- STRAIGHT BEVEL GEARS
- SPIRAL BEVEL GEARS
- WORM GEAR SETS AND WORM GEAR DRIVES
- GEAR RACKS AND GEAR SEGMENTS
- SPROCKETS
- GEAR SHAFTS AND SPLINED SHAFTS
- POWER TRANSMISSION AND ROTATING COMPONENTS
- AXLES
- AXLE SHAFTS / HALF-SHAFTS
- PULLEYS
- COUPLINGS
- GEARBOX COMPONENTS
- TRANSMISSION COMPONENTS
- SPECIAL DRIVE-SYSTEM COMPONENTS
- OTHER MACHINE COMPONENTS AND SPECIAL FASTENERS
- BUSHINGS
- FLANGES
- HOUSINGS AND SUPPORTS
- PUMP COMPONENTS
- HYDRAULIC SYSTEM COMPONENTS
- DEFLECTORS
- EXHAUST SYSTEM COMPONENTS
- OTHER PRECISION-MACHINED COMPONENTS MANUFACTURED TO CUSTOMER SPECIFICATIONS — FROM ONE-OFF PARTS TO SMALL PRODUCTION RUNS!

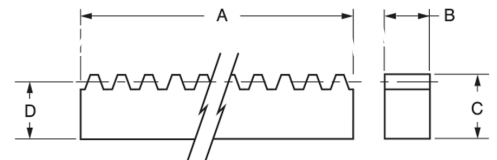

CYLINDRICAL GEAR

MATERIALS: QUENCHED AND TEMPERED STEEL, CASE-HARDENING STEEL, BRONZE, PLASTIC, POLYAMIDE

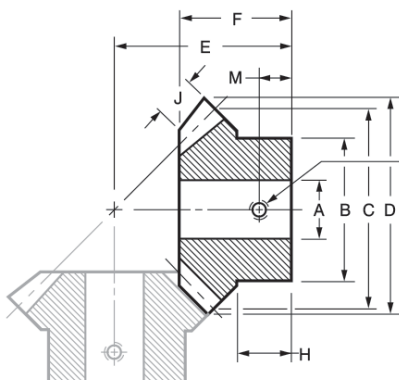

GEAR RACK

MATERIALS: QUENCHED AND TEMPERED STEEL, CASE-HARDENING STEEL, BRONZE, POLYAMIDE

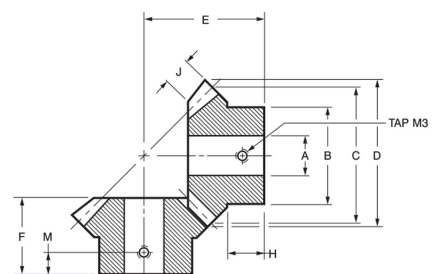

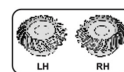

STRAIGHT BEVEL GEAR

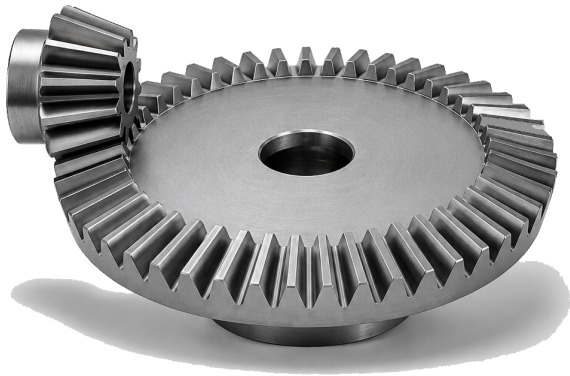

MATERIALS: QUENCHED AND TEMPERED STEEL, CASE-HARDENING STEEL, BRONZE, POLYAMIDE

SPIRAL BEVEL GEAR

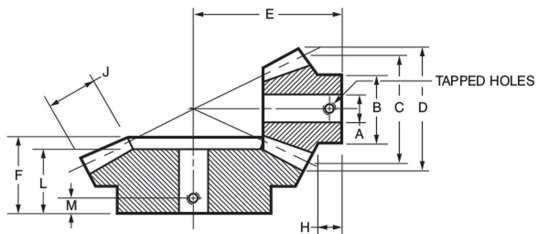

MATERIALS: QUENCHED AND TEMPERED STEEL, CASE-HARDENING STEEL, BRONZE, PLASTIC, POLYAMIDE

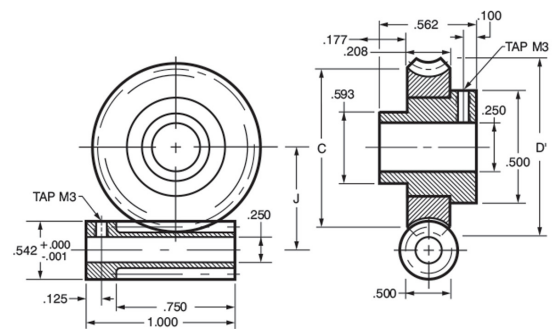

STRAIGHT BEVEL GEAR

MATERIALS: QUENCHED AND TEMPERED STEEL, CASE-HARDENING STEEL, BRONZE, POLYAMIDE

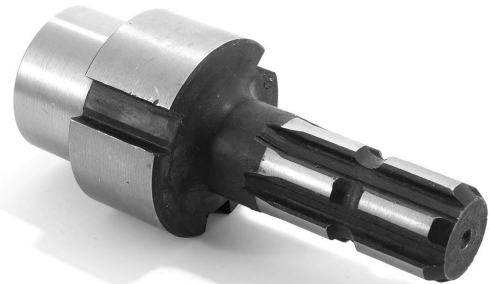

WORM GEAR DRIVES

MATERIALS: CASE-HARDENING STEEL, BRONZE, GREY CAST IRON

GEAR SHAFTS

SPLINED SHAFTS

GEAR SEGMENTS

SPROCKETS

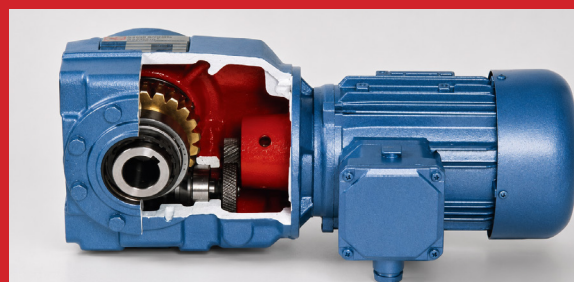

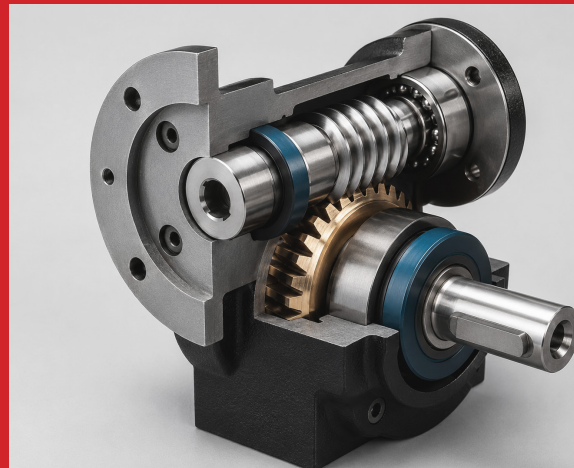

MACHINE ASSEMBLY OVERHAUL

State-of-the-art equipment, combined with a highly skilled team with extensive professional experience in precision machining, manufacturing, and the servicing and overhaul of mechanical assemblies, ensures that every client receives a reliable, professional service with no room for improvisation or compromise.

Superior quality, precision, and transparent pricing ensure that, with the services of REMID VIS – MACHINING CENTER, your business keeps moving, while agreed deadlines are consistently met.

IN LINE WITH EUROPEAN STANDARDS

REMID VIS – MACHINING CENTER is the first Montenegrin company in the field of precision engineering services to implement European management standards in its operations:

SERVICING & OVERHAUL OF GEARBOXES, VARIABLE-SPEED DRIVES, ELECTRIC MOTORS, HYDRAULIC PUMPS & HYDRAULIC SYSTEMS

ISO 9001 – Quality Management Systems

ISO 14001 – Environmental Management Systems

OHSAS 18001 – Occupational Health and Safety Management Systems

ISO 45001

ISO 50001 – Energy Management Systems

ISO 22301 – Business Continuity Management Systems (BCMS)

We also have an established network of reliable associates and partner companies whose quality of service we stand behind. This enables us to provide comprehensive solutions even for the most demanding technical challenges.
